| Degree | University/Institute | Year | CGPA/Marks(%) |
|---|---|---|---|
| B.Tech Electrical Engineering | IIT Hyderabad | 2027 | 8.2 |
| B.Tech in Entrepreneurship (Double Major) | IIT Hyderabad | 2027 | 9.2 |
| XII (CBSE) | Devagiri CMI Public School Calicut | 2023 | 98.60% |
| X (CBSE) | Kendriya Vidyalaya Kannur | 2021 | 97.40% |

## EXPERIENCE

**Product Management Intern | Country Delight** May–Jul'26

Country Delight is a tech-driven, farm-to-doorstep (D2C) brand that delivers milk and food essentials through an integrated supply chain.

- **Product Discovery & Strategy**: Analyzed 4 behavioral cohorts and mapped end-to-end user journeys, identifying 76%+ pre-product-list drop-off driven by single-category app perception, informing grocery discovery strategy.
- **Feature Execution & GTM:** Designed a Store feature through PRDs, wireframes, and interactive HTML prototypes, introducing tiered spend thresholds to drive first add-to-cart actions and increase AOV.
- **Unit Economics & Growth:** Replaced a high-burn cashback acquisition approach with a margin-conscious grocery trial strategy, aligning Growth, Design & Engineering on sustainable incentive thresholds.
- **Cross-Functional Execution:** Coordinated 15-day sprints, engineering grooming, MoEngage tracking & phased A/B testing.

**WiSH Mentorship Programme 2025 | Texas Instruments**

- **Product Development:** Designed a rural flood detection system integrating environmental sensors, wireless communication, and real-time alerts to address early-warning gaps applying design thinking principles.
- **Technical Feasibility:** Developed solar-powered architecture, balancing energy efficiency, reliability & off grid deployment.
- **AI & System Integration:** Explored on-device ML forecasting using TensorFlow Lite, integrating hardware and software components.
- **Analog Systems Design:** Collaborated on FM modulation and PPG monitoring prototypes, translating technical requirements into functional solutions and validating performance through real-time testing.

## PROJECTS

**Quick-Commerce Product & Customer Analytics | Python, PowerBI, SQL**

- Analyzed 3M+ orders, 206K customers, and 34M items from the public Instacart dataset, applying customer segmentation and order-sequence retention analysis to decode purchase behavior at scale.
- Uncovered a 59% reorder rate and 10-item average basket size, segmenting customers by purchase frequency to surface distinct behavioral cohorts and retention opportunities.
- Built an interactive Power BI dashboard with DAX measures translating reorder rates, basket size and segment behavior into retention insights directly applicable to quick-commerce ordering platforms.

**AI-Assisted ED Triage and Hospital Routing Prototype | Accenture Innovation Challange**

- Built a Streamlit ED triage prototype using Gradient Boosting with uncertainty-aware prioritization & safety escalations.
- Engineered constraint-based routing across 5 hospitals, optimizing referrals by specialty, bed capacity, diagnostics & ED load.
- Implemented clinician overrides, SQLite audit logs, deterioration alerts & surge simulations to model queue & capacity bottlenecks.

**Case Study: Rural Retail Digitisation | Market Entry & Financial Feasibility | Department Of Management Project**

- Evaluated digitisation gaps among rural micro-retailers, identifying poor bookkeeping & credit leakage as key business challenges.
- Designed a voice-first, vernacular bookkeeping solution tailored to low digital literacy & limited connectivity, translating to product.
- Evaluated 5 GTM models using competitive benchmarking & unit economics, recommended partner-funded distribution.
- Built a 5-year financial model projecting INR 1.93 Cr NPV, estimated 32K-merchant break-even & advised stage-gated pilot.

**Agentic Personal Discovery and Action Engine | Python, Streamlit, SQLite**

- Framed information overload in product discovery as a testable hypothesis and designed an agentic flow from plain language intent to explained, constraint-verified recommendations with save, compare and refine actions.
- Built a multi-agent recommendation engine on 283 synthetic catalogue, combining intent parsing, ranking, constraint & verification.
- Benchmarked 3 ranking approaches on 23 queries, Precision@5 rose from 44% to 97%, constraint violations fell from 44% to 0%.

## POSITIONS OF RESPONSIBILITIES

**Undergraduate Representative | Student's Gymkhana, IIT Hyderabad** May'25-March'26

- Represented 2,000+ undergraduates as the primary student–administration liaison and advocating for student needs.
- Led 60+ class representatives to identify, consolidate, and prioritize recurring student issues for administrative resolution and Implemented a structured feedback system to translate student needs into actionable policy improvements.
- Led end-to-end execution of an Rs.8 lakh event for 1,600+ attendees, directing 15+ volunteers across theme development, decor, catering, logistics, and faculty-administration coordination to deliver a seamless large-scale event.

**Consulting Domain Coordinator | Finance & Consulting Club, IIT Hyderabad** Aug'24-April'25

- Selected from 120+ applicants to lead consulting initiatives for a 700+ member community and Led Horizon's flagship industry panel end-to-end, coordinating 15+ industry experts across speaker outreach, panel curation, and execution.
- Drove an institute-wide case competition across 20+ hostels, managing end-to-end planning, coordination, and on-ground execution.

## SKILLS & RELEVANT COURSES

**Technical Skills & Tools :** Python, SQL, Excel, Power BI, Streamlit, Jira, MoEngage, PowerPoint

**Bussiness Courses :** International Business,Innovation Management, Introduction to Sales & Marketing, Finance for Engineers, Marketing Research, Fundamentals of Organizational Structure, Game Theory for Startups,Economics for Technocrats,Foundation of Design Thinking for Entrepreneurship

**Analytics Courses :** Visual Analytics, Predictive Modelling, Artificial Intelligence, Bussiness Analytics using Python, Probability

## EXTRACURRICULAR

- **Inter IIT Cultural Meets (7.0 & 8.0):** Represented IIT Hyderabad in culinary competitions and slam poetry, served as Cup Captain for the Culinary Contingent at Meet 8.0, securing a Top 5 finish in culinary competitions.
- **Culinary club:** Co-founded the institute's Culinary Club, building a platform to develop culinary talent & prepare for Inter IIT culturals.
- **Product Curiosity:** Enjoy dissecting everyday products, questioning design choices, and spotting user pain points, occasionally sharing my perspectives and ideas on LinkedIn. ( https://lnkd.in/p/dcq4k2Ey , https://lnkd.in/p/dae4zKW8 )
- **Beyond the Classroom**: An avid reader, runner, and enthusiastic baker.
